

ADULT ORTHODONTICS

Orthodontic treatment is generally undertaken for children, however Orthodontic treatment can be successful at any age and increasing number of our patients are adults.

The biological process involved in tooth movement is the same in both adults and children. The health of your teeth, gums and supporting bone is the most important factor in determining your suitability for Orthodontic treatment.

Because an adult is no longer growing certain types of corrections are not possible with braces alone, however, much can be achieved and can be discussed individually.

Aesthetic braces and modern materials can now make Orthodontic treatment more acceptable for adults, treatment duration may vary depending on the severity of the problem.

Our practice only accepts adult patients independent of the NHS.

The cost of treatment will depend on the severity of the problem and a written quotation will be available after an initial consultation.

Payment can usually be spread over the duration of treatment, and convenient financing packages are also available.

APPOINTMENTS

Opening hours.

Monday - Friday	9.00am - 5.00pm
Closed for lunch	2.00pm - 3.00pm
NHS Consulting Hours	9.00am - 2.00pm

Oakwood Station	Bus 121

Trains:

Nearest British Rail Station:

Enfield Chase. Gordon Hill.

Nearest Underground:

Oakwood (Piccadilly Line)

Car Park: Ample on site car parking facility.

Facilities: Our surgeries and reception areas are currently not accessible to wheelchairs.

MORE CHOICE - The Independent Option

You as an individual can participate in choosing the most suitable treatment option.

You have a more attractive option of aesthetic braces. The ceramic and plastic braces blend in with the teeth and are next to invisible. However they are not suitable for all cases and this can be discussed individually at the consultation.

You have more choice for appointments outside our normal NHS consulting times.

Your treatment can be commenced without delay as it avoids the need for NHS prior approval.

Your Orthodontist has greater choice in the individual prescription of treatment and is not restricted by NHS regulations in the number and design of the appliances that can be used.

COST, depends on the treatment required but can usually be spread over the duration of the treatment, in addition convenient financing packages are also available

THE TEAM

Orthodontists.

Mr Hemant A Patel BDS FDS RCS(Ed) MOrth, qualified in 1982 and completed his post graduate Orthodontic training in 1987 from Liverpool. Has been in Orthodontic Practice since 1988 and until 2001 taught Orthodontics at King's College Hospital Dental School.
